

## SAVE THE DATE – Press Invitation

Schalksmühle / Germany, August 2021

Invitation

**JUNG loves ...“Exhibition of Things”**

**Installation by JUNG at the Fuorisalone 2021, Milan, September 5-10, 2021**

press preview

on 4 September 2021 3 - 5 pm

Our hearts beat four billion times during our lifetimes • Feeling and thinking, intuition and logic, devotion and planning • who loves changes • nothing remains as it was • upheaval, awakening, passion • coming out of one's shell, growing beyond oneself • creating a new 'we' •

The installation **JUNG loves ...** allows visitors to the Fuorisalone 2021 / Brera Design District to feel the heartbeat of JUNG – intense, physical, magical, enraptured. Sound, projection, colour and objects radiate energy. The assemblage of yesterday, today and tomorrow invites the onlooker to immerse themselves in a high-density environment with associations of proven impulses for design and architecture and at the same time – teeming life and intoxicating irritation. **JUNG loves ... kicks in – enjoy!**

## **raumkontor interior design**

raumkontor is a transdisciplinary team of interior designers, architects, scenographers and media designers, founded in 1993 by Andrea Weitz and Jens Wendland. Due to the team's broad skillset, the project spectrum is diverse. For each project, the office develops independent design solutions tailored to the client and project situation. Holistic spatial concepts, clear and distinctive guiding principles and innovative functional structures ensure long-term and sustainable project quality. One focus of raumkontor's work is the planning of exhibition stands and the development of scenographic concepts. The office is known for its idiosyncratic designs, which have received several awards (Finest Interior Award, Famab Award, DDC, Iconic Award, German Design Award). The trade fair and exhibition scenarios developed by raumkontor tell vivid stories and have memorable and inspiring designs, with the passion of the designers and their unbridled desire for the unexpected always able to be felt.

raumkontor stands for the other in rooms and Things, and for the fundamental deviation that creates character. This is also reflected in the office's leitmotif: We're designers. We make Things different.

## **JUNG – progress as tradition**

JUNG is a premium supplier of modern building technology. Switches, sockets, dimmers, observers and systems for controlling functions in private homes and commercial buildings are part of the portfolio of this medium-sized, traditional company. Founded in 1912, the former drive technology company still drives forward the development of switch and control products today. JUNG develops and manufactures products with timeless designs as well as pioneering and future-oriented solutions. JUNG's switch designs and applications can be adapted to individual requirements. They are manufactured at two sites in Schalksmühle and Lünen. For this, the company was awarded the "Made in Germany" certificate from TÜV Nord. Firmly rooted in the region and a reliable employer for many decades, customers all over the world today similarly rely on JUNG's consistently high quality. At the same time, JUNG is aware of its high responsibility when it comes to sustainable and energy-efficient production. The team spirit of the more than 1,400 employees in the 19 subsidiaries and 70 agencies in Europe, North America, the Middle East and Asia contributed significantly to this.
